RANY BOY TEMPLADO

Associate Software Engineer | SAP Data Migration & Full-Stack Automation

Trece Martires City, Cavite, Philippines | +63 993 469 8243 | ranyboytemplado@gmail.com | linkedin.com/in/rany-boy-templado-b3a532306 | github.com/ranyboytemplado | ransnotdev.vercel.app

PROFESSIONAL SUMMARY

Detail-oriented Associate Software Engineer with proven hands-on capability in SAP S/4HANA data migration, automated workflow engineering, and resilient full-stack web applications. Experienced in configuring migration objects (LTMC/LTMOM), building pre-load validation pipelines, harmonizing legacy relational schemas, and developing headless automation using Python, n8n, and SQL. Combines a disciplined background in high-volume enterprise data operations with modern software engineering practices, delivering 99.8%+ data accuracy, zero critical production loss, and audit-ready architectures.

TECHNICAL SKILLS

SAP & Enterprise Data: SAP S/4HANA, SAP ECC, LTMC (Migration Cockpit), LTMOM (Migration Object Modeler), SAP GUI, Data Cleansing, Schema Harmonization, Source-to-Target Mapping, Pre-Load Validation, Post-Load Reconciliation, Audit Trail Compliance, Data Quality.

Workflow & Automation: Excel Automation (Advanced Formulas, VBA, Power Query), n8n, Zapier, Python ETL Workers, REST Webhooks, Task Orchestration, Automated Data Extraction.

Languages & Web Stack: JavaScript (ES6+), React 18, PHP, Node.js, Express, Python, Java, SQL, C++, HTML5, CSS3, Relational Database Design, MySQL, Schema Normalization (3NF), RESTful APIs.

AI Engineering & Tools: Multi-Provider AI Fallback Architecture, Prompt Engineering, Edge Routing, Windsurf, Kiro, Codex CLI, Antigravity IDE, Claude, Copilot, Cursor, Gemini.

Tools & Methodologies: Git, GitHub, Version Control, Agile/Scrum, CI/CD Concepts, SDLC, Postman, Vercel, Linux/Unix Shell, Root Cause Analysis (RCA), Standard Operating Procedures (SOPs).

PROFESSIONAL EXPERIENCE

ACCENTURE
May 2026 - Present

Associate Software Engineer *Philippines*

- Specialize in enterprise **SAP S/4HANA data migration pipelines**, legacy ERP data extraction, and automated validation frameworks.
- Configure, test, and execute migration objects using **SAP LTMC** and **LTMOM** to map complex enterprise business entities (customer master, vendor records, transactional data) with zero data loss.
- Implement data cleansing, format harmonization, and automated audit checks using **Python and SQL** to validate relational integrity prior to production loading, maintaining **99.8%+ accuracy**.
- Collaborate with functional analysts and technical architects across the full software development lifecycle (SDLC) within agile sprint environments.
- Document technical mapping specifications, transformation rules, and migration runbooks to ensure strict auditability and enterprise governance.

GLOBAL STRATEGIC
Mar 2026 - May 2026

Data Entry Associate *Cavite, Philippines*

- Processed, validated, and reconciled high-volume enterprise billing and operations records with a **99.9% accuracy rate** across high-throughput production queues.
- Identified data anomalies, duplicate entries, and relational inconsistencies across legacy source systems and executed systematic corrections.
- Maintained strict adherence to compliance guidelines, confidentiality protocols, and data governance standards for enterprise client documentation.

TELEPERFORMANCE & FOUNDEVER
Oct 2025 - Mar 2026

Customer Service Representative *Philippines*

- Resolved complex technical and operational customer inquiries across omnichannel platforms (chat, voice, ticketing systems), consistently achieving **95%+ CSAT ratings**.
- Accurately logged, categorized, and tracked incident records and customer interactions within internal CRM systems according to standard operating procedures (SOPs).
- Partnered with operations leads and quality assurance specialists to identify common failure modes, document troubleshooting guides, and streamline ticket resolution time.

FREELANCE
Aug 2024 - Oct 2025

Full-Stack Web Developer & Automation Specialist *Remote*

- Engineered and deployed customized full-stack web applications and automation pipelines for clients using **React, PHP, MySQL, and Python**.
- Developed a full-stack **Dental Clinic Management Portal** featuring role-based access, conflict-free appointment scheduling, and automated reminders, reducing scheduling overhead by **40%**.
- Designed normalized MySQL relational schemas and REST APIs for asset valuation and real estate scheduling platforms, improving query response times.
- Built automated webhook integration workflows using **n8n and Zapier** to sync form leads, notifications, and client database records in real time.

TECHNICAL PROJECTS & IMPLEMENTATIONS

SAP S/4HANA Migration & Reconciliation Workbench — Enterprise Solution

SAP S/4HANA | LTMC / LTMOM | SQL | Python | Excel Automation

- Engineered an end-to-end data migration simulation pipeline facilitating legacy schema harmonization, transformation mapping, pre-load validation, and discrepancy audit logging.
- Automated field-to-field validation rules and reconciliation reports, ensuring zero data loss across legacy ERP records.

High-Availability Multi-Provider AI Gateway — Vercel Serverless

Node.js | Edge Routing | REST APIs | Resilience Patterns

- Designed and deployed a serverless AI proxy routing chat requests across an ordered **9-provider fallback chain** with automatic cooldowns and sub-200ms latency.
- Enforced zero exposed client API keys through server-side secret isolation and environment encapsulation.

PhysiCapital - Asset Valuation & Capital Management Portal — Full-Stack Web Application

React 18 | Vite | Node.js | REST APIs | CSS3

- Built a responsive capital management platform providing physical asset valuation metrics, interactive portfolio telemetry, and high-performance dark-mode interfaces.
- Integrated normalized data endpoints for tracking diversified physical holdings with real-time valuation updates.

DentalCare Clinical & Appointment Workflow Portal — Healthcare System

PHP | MySQL | JavaScript | Bootstrap

- Architected a complete clinical records and appointment booking system featuring multi-role authentication, schedule conflict resolution, and automated appointment reminders.
- Optimized MySQL relational schema with indexing on patient IDs and appointment dates to support concurrent clinic bookings without double-booking errors.

Real Estate Valuation & Property Viewing Platform — Web Application

PHP | MySQL | JavaScript | HTML5 / CSS3

- Developed a centralized real estate platform enabling prospective buyers to schedule guided property viewings and calculate estimated asset values.
- Implemented administrative management dashboard for brokers to track leads, property inventories, and client follow-ups.

EDUCATION

Perpetual Help College of Pangasinan — Aug 2021 - Jun 2025

Bachelor of Science in Information Technology (BSIT) — *Malasiqui, Pangasinan, Philippines*

- **Academic & Technical Focus:** Database Management Systems (RDBMS), Object-Oriented Programming (Java, C++), Web Technologies (PHP, JavaScript), Software Engineering, Data Structures & Algorithms, Network Infrastructure.
- **Competitions:** Participant, CodeChum National Programming Challenge 2024.

CERTIFICATIONS & VERIFIED CREDENTIALS
